Art Unit: 2852

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The title of the invention has been changed to - - IMAGE FORMING METHOD AND SYSTEM WITH A FINISHING CAPABILITY - -.

In The Specification:

Page 39, line 2 of the abstract, after "forming" the expression - - method and - - has been inserted.

The above amendments were made in accordance with the practice set forth in M. P.E.P. sections 608.01(b) and 1302.04, respectively, in order to correct informalities noted in the subject application by the Examiner.

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

It does not state that the person making the oath or declaration has reviewed and understands the contents of the specification, including the claims, as amended by any amendment specifically referred to in the oath or declaration.

In view of the submission of method claims 15-17 to a different statutory class of invention from the originally filed apparatus claims 1-14 in the preliminary amendment of April 23, 2004, a supplemental oath and/or declaration which is in compliance with 37 CFR 1.63 and 37 CFR 1.67(b), respectively, is deemed appropriate and required.

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is

Art Unit: 2852

requested in correcting any errors of which applicant may become aware in the specification.

The following is an examiner's statement of reasons for allowance: The claims are considered to patentably define over the prior art of record because the prior art fails to disclose (1) the method steps of stapling a stack of sheets including sheets of different sizes when certain edges of the different sized sheets are aligned with each other, as recited in base claims 15-17, respectively; and (2) the prior art fails to disclose a control unit for controlling the sheet feeding unit to selectively feed pages with different orientations for printing and stapling/finishing together, as recited in base claims 18 and 19, respectively .

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication should be directed to Fred L. Braun at telephone number (571) 272-2132.
